Additional course topics available. Private classes available for 10+

Understanding the NYS Security / Fire Alarm Installer License Requirements:

Need for license: An individual, firm, company partnership or corporation must be licensed if it installs, maintains or services alarm systems, including, but not limited to, such items as detectors, control devices and alarm communication systems, conduits and associated wires of alarm systems; or if it holds itself out to the public as being able to do so. **This shall include, but not be limited to,** selling alarm systems to consumers when the installation, maintenance or servicing of the alarm system will be subcontracted to or otherwise performed by another;

A **security and fire alarm installers license is required for the installation, maintenance or servicing** of a closed circuit television system (CCTV), or video surveillance system, if such system is used, either full-time or part-time, for the detection or monitoring of intrusion, break-in, theft, movement, sound or fire; and electrical entry systems which detect and/or provide notification of intrusion, break-in, theft, movement, sound or fire regardless of the number of entry points.

Who Should Attend? *Technicians, service personnel, installation personnel, sales staff, and business owners.*
